Evergreen Transplants for Lining Out

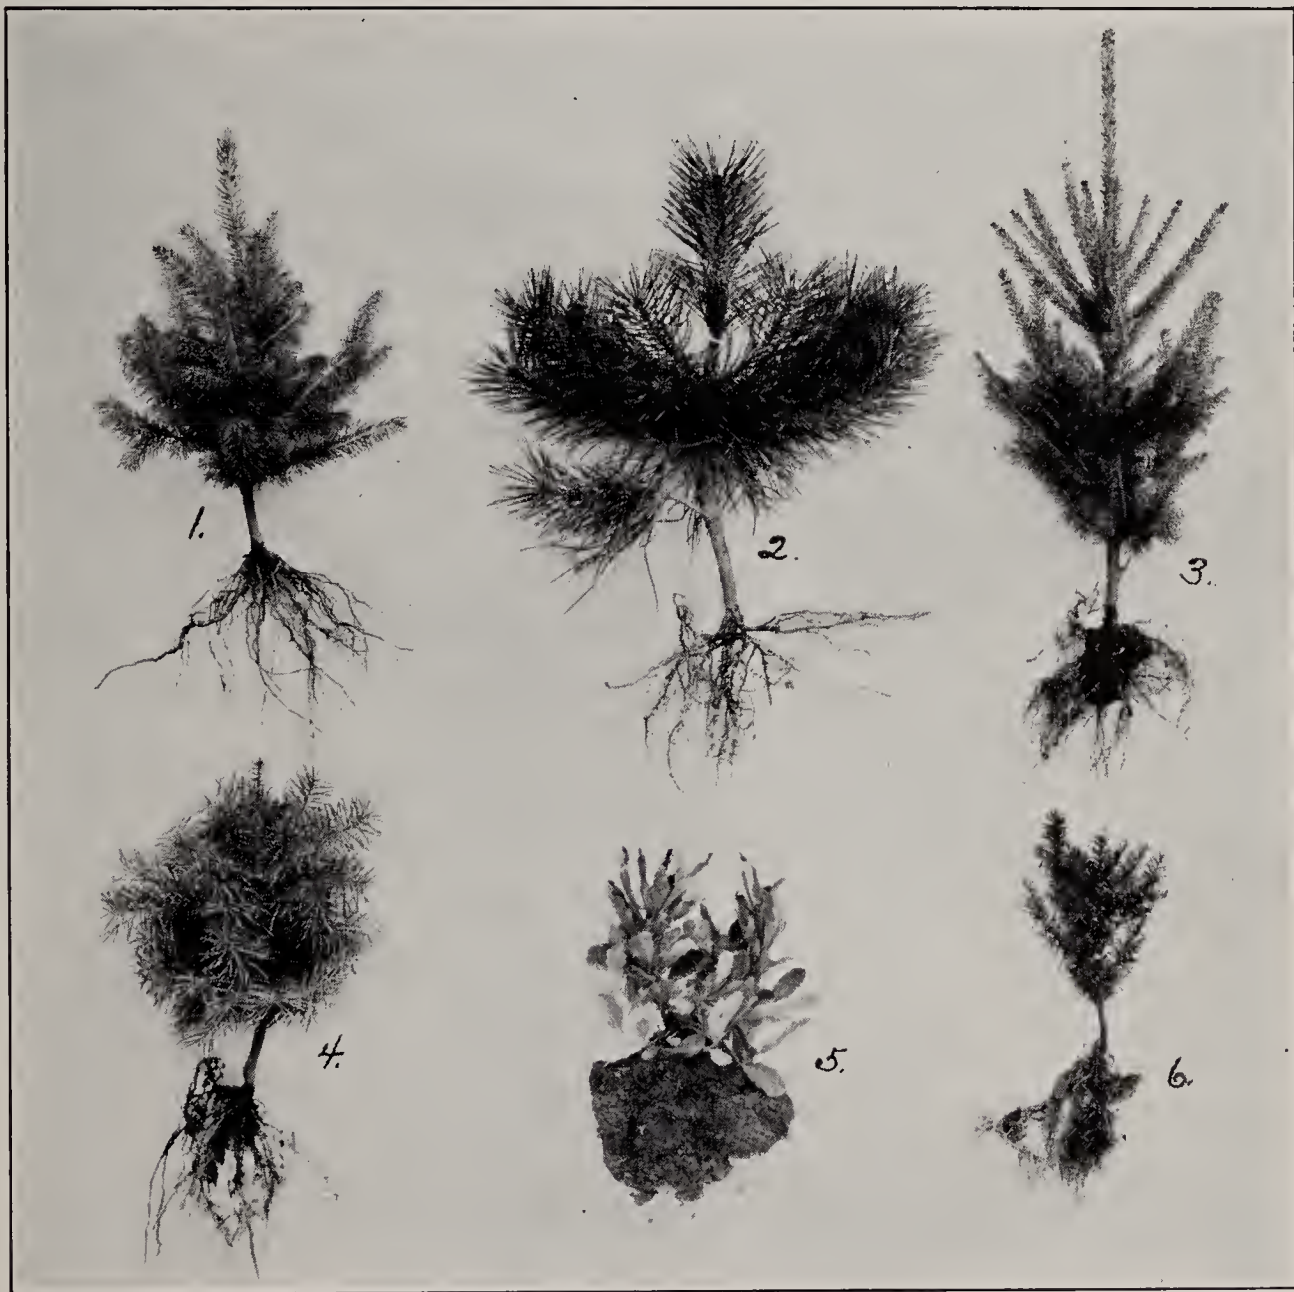

Our transplants will please you. They are growing on gravelly soil with plenty of space for development. This assures both a good top and root system. Part are from beds under irrigation. The majority, however, are from field rows.

Give us a trial order and let the stock speak for itself.

Mugho Pine

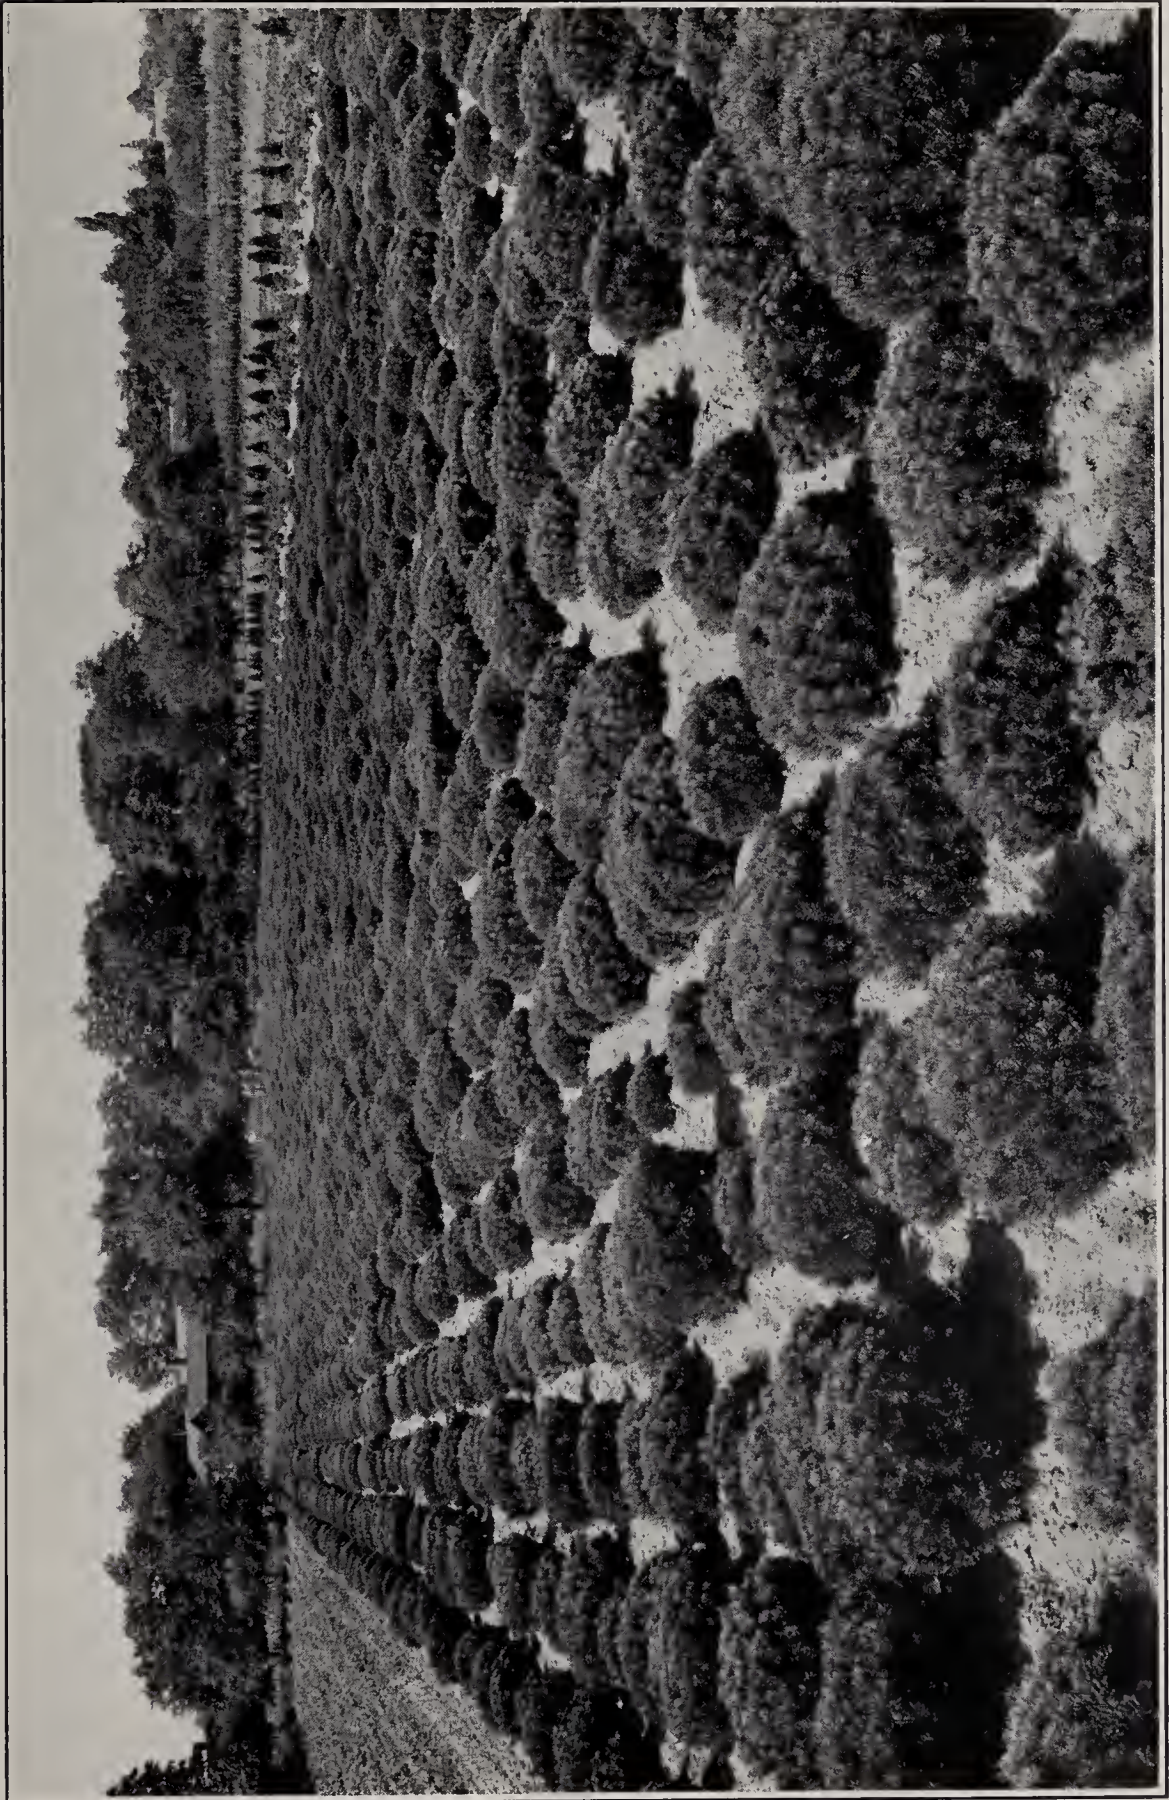

MONTANA MUGHUS (Mugho Pine). These Mugho Pine are the desirable slow growing compact type with an excellent root system. These have also been sheared. We feel quite qualified to name ourselves "Headquarters for Mugho Pine."

NOTE:—Winter color richness and unusual resistance to abuse and red spider places Mugho Pine far above Globe Arbor Vitae, etc. Why not use more of them in your plantings and have satisfied customers?
